Crocus Planting Sign

To help Rotary clubs and Floral Groups spread the word in their communities, we have produced Purple4Polio themed signage to erect alongside your crocus planting locations.

Two versions of the crocus planting sign have been created depending on who is taking part in the mass planting:

- Rotary club(s) and RHS Bloom Group/floral organisation collaborative planting
- Rotary club(s) solo planting

Sign templates, in addition to a host of other promotional materials which can be found in the **Purple4Polio section** of the website.

Both signs have been created in editable PDF format, meaning you can enter the details of your club and any planting partners.

The PDFs are production ready, meaning that once you have filled in your details, it can be sent to your local sign maker for manufacture.

Although clubs are free to use their local sign manufacturer, Rotary International in Great Britain and Ireland's recommended supplier of signage is **Kaleidoscope Imaging Ltd**, who are based in Birmingham. They can be contacted via email (sales@tkpnet.com) and telephone (0121 771 1171).

We look forward to seeing these signs across the length and breadth of Great Britain and Ireland!

For 2017, there will be another opportunity for your crocuses to appear on our planting map, which will go live during the start of the 2017/18 Rotary year.
