

PLASTIC IS

POLLUTION!

Why is plastic used?

We researched why plastic is used so much and these were some of the reasons we found.

- It is versatile
- We use it because it is cheap and strong
- It helps protect foods, medicines and other products

However, it affects the environment!

- It can affect human health
- Plastic can harm other animals if it isn't disposed of properly
- Plastic can ruin other animals' habitats

This isn't right!

So, what can we do?

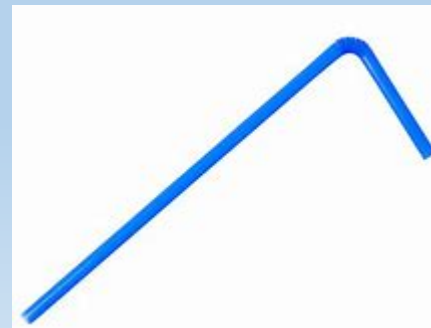

Here at Holy Trinity we have set up a recycling scheme to help recycle batteries and we have been in contact with the council to ensure we have more recycling bins for card, paper and other recyclable materials.

However, we have also come up with an idea that all of the community could get involved with....

Fish Fridays

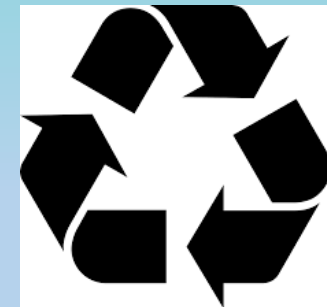

Our idea is to fish for plastic on the last Friday of every month.

As a family and across schools, people can decide on an area in their local community that needs clearing of plastic waste.

People can decide to go to beaches, parks or even walk down the streets as long as they pick up plastic on the way!

Remember to check whether the plastic can be recycled!

Finally, remember to...

Reduce

Reuse

Recycle

Thank you for listening.
